

Sustainable Products

Johnsonite is committed to creating systems with long functional lives to minimize resources and energy consumed by alternate materials. Each of our solutions are environmentally compatible and offer human, life-safety and productivity benefits, as well as a significant return on investment. All of our solutions contribute in one way or another to help obtain LEED points. Many of these solutions are FloorScore certified meaning they are third-party tested and meet the strict requirements for indoor air quality.

We believe that creating sustainable products is good for business – ours and our customers’.

Highly sustainable products are eco-sensitive. But they’re also good for the health, safety and productivity of the people who use the space. And good for the organization’s bottom line. Here’s a list of our highly sustainable products:
